

INTRODUCTION

Beginning

Founded in 2021, KubeCoin is the central DeFi token that will be used for transactions on our **Kube Ecosystem** and on our partnering platforms. Our innovation hub will present promising ideas, and will help us attain our long-term goal of becoming the **sole currency** used to cover travel and leisure costs in the **real world**.

Consumer demographics

Young minds, adventurers, the people that don't follow society, millennials that seek new experiences. Gen Z is an increasing target market for KubeGroup. At the moment, and it represents 30% of our target audience and will represent an estimated 35-40% of our user base in three years time. Additionally, we've seen an exponential growth with our Gen X customers in the last year.

Innovation

In the next three years, our company aims to become an innovation hub. All resources will be dedicated to: fresh ideas, new business lines, startups, creating different interconnected products, websites and applications in order to maximise our profits while also reducing costs. All of our chosen projects will be handled within the same group, with a unified vision. The target is to become a multi-brand company called the Kube Group, while at the same time implementing KubeCoin and watching it become the standard currency for the leisure and travel industries.

Why

The model was implemented in order to maximise our scalability and profitability in the near and far future, particularly thanks to the help of: leveraging resources, reductions in management and operating costs and the maximization of our global expansion by centralizing the technology. Everything flows through the KubeSystem, our strong technology which was designed to connect and automatize the processes of our business lines and partnering platforms.

GAP

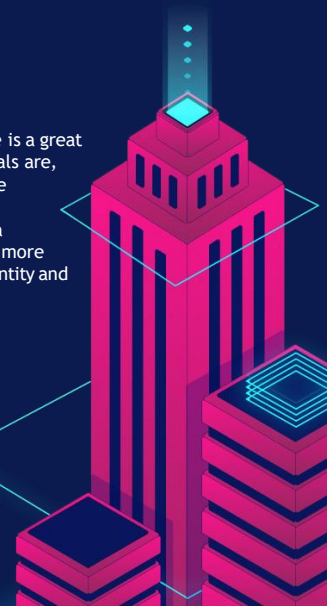

The users decision made for them. We revolutionized this concept so that the choice was up to our system. It is faster, easier, secure and much more dynamic.

How

"The secret to avoiding stagnation, is to create brands that are flexible and can work in several different markets with many different lines of business, for example; travel, restaurants, gift cards and boxes, leisure, nightlife and much more. KubeCoin and the KubeSystem are the major programs which support the engine."

Opportunity

Create an identity: the launch of Kube is a great opportunity to represent what our goals are, what we want to achieve and what we can offer our users in terms of value. The more we establish the brand as a positive presence in the industry, the more chances we'll have to build brand identity and customer loyalty.

What's KubeCoin?

KubeCoin, which is a decentralized DeFi Token. It provides a high utility layer to our KubeSystem. It can be used on our platforms and acts as a reward for our returning customers and promoters. The long-term goal is to become the major currency in the leisure and travel industries.

Why develop KubeCoin & Kubetrade.pro Website?

The first idea was to use it just as a Marketing tool to increase consumer loyalty and help promoters/influencers to spread the concept through our community and attract new users. We realized it's much more than that. KubeCoin is the basis to directly connect our platforms with our users. The long term goal is to revolutionize the leisure and travel industries and become the sole currency through our multi-brand platforms and partners.

WHAT'S BEHIND KUBECOIN?

KubeCoin, the decentralized Token for the Travel & Leisure Industry.

Kube Ecosystem

FlyKube

The matrix, a startup founded in 2017 offering Surprise trips. Currently, the company's gross profit is around € 5,000,000. It operates in Spain, France, Italy, Portugal, Germany, Austria and Switzerland.

EatKube

It transforms the way in which people experience dining out and takeaways with their friends and family, particularly as it involves magical surprise food experiences.

Kube Swap

An integration in our Wallet where users can exchange their tokens.

NFT Project

Our own unique collection of NFTs will give their holders first access to exclusive events, special sales, airdrops, and a lot of unique benefits.

KubeCoin

Decentralized token.

KubeBox

Coming soon.

KubeIn

Investment Fund focused on Crypto and Startup projects.

NFT Platform

A Marketplace for buying and selling NFTs based on the Cardano Blockchain.

KubePay

Our own Wallet with the ability to receive, send and exchange tokens, together with the possibility of staking and accessing our unique Marketplace and NFT platform.

GoKube

Coming soon.

USE CASE

Use KubeCoin to pay for your Travel & Leisure activities on our platforms, global premium partners and earn rewards.

How to acquire Kubes

The user will acquire KubeCoins through our platforms: Buying or as special rewards. The more our #Kubers involve themselves and interact, the more they can earn.

A constant transaction flow through our platforms.

Premium partners

Thanks to the real use of KubeCoin, users will be able to buy products from our global premium partners which are dedicated to the Travel and Leisure industry, whether that be Hotels and Restaurants, tickets for performances or recreational activities.

KubePay

Our own wallet will be available for iOS and Android where you will be able to buy and sell Cardano Native Tokens, purchase Leisure & Travel products from our platforms, and our global premium partners, access our NFT Online Marketplace and NFC Payments.

Kube Use

The user will be able to pay their hotel, restaurant, and leisure activity expenses with KubeCoin! KubeCoin is becoming the standard coin to use for all of your travel & leisure needs in the real world. You will be able to link your account to the app for easier access and pay for everything through NFC.

Kube Marketplace

Pay with KubeCoin on our platform marketplace and with our global premium partners. Get special discounts and offers only available using our coin.

NFT Platform

Online Marketplace for Non-fungible Tokens, where the user will be able to buy and sell their assets.

Kube Club

The user will earn miles with every purchase made on our platform or on our global partners' platforms. With our Kube Club, we will create a reward system that will allow the user to exchange these points for Kubes or rewards.

Kube Swap

We will create our own **Swap Exchange**, an interactive platform to exchange digital currencies into KubeCoins with the objective to stimulate the use of our coin thanks to our low fees and exchange rate policy.

NFT Project

Our own NFT project where the holders will have exclusive benefits such as access to our events, airdrops, voting, special deals, and more to come.

MILESTONES ACHIEVED & FUTURE PROGRESS

KubeCoin strategy diversifies and moves into different channels to expand the user base and reach various market sectors.

In 3 years, the company achieved all of its goals. In the next 3 years, it hopes to expand. The new investment capitalization purpose is to accelerate the process, creating strong technological developments in order to scale up the business, hire key employees, and to optimize the resources.

The roadmap outlines below has been created in order to highlight the company's general principles, and includes some key steps that are based on estimates of the direction in which the company will go in.

3 Phases

Pre-sale
Q3 2021

16% of KubeCoins are generated and distributed for the Pre-sale.

• **Completed!** •

ICO
Q2 2022

14% of the supply is distributed to the Initial Coin Offering.

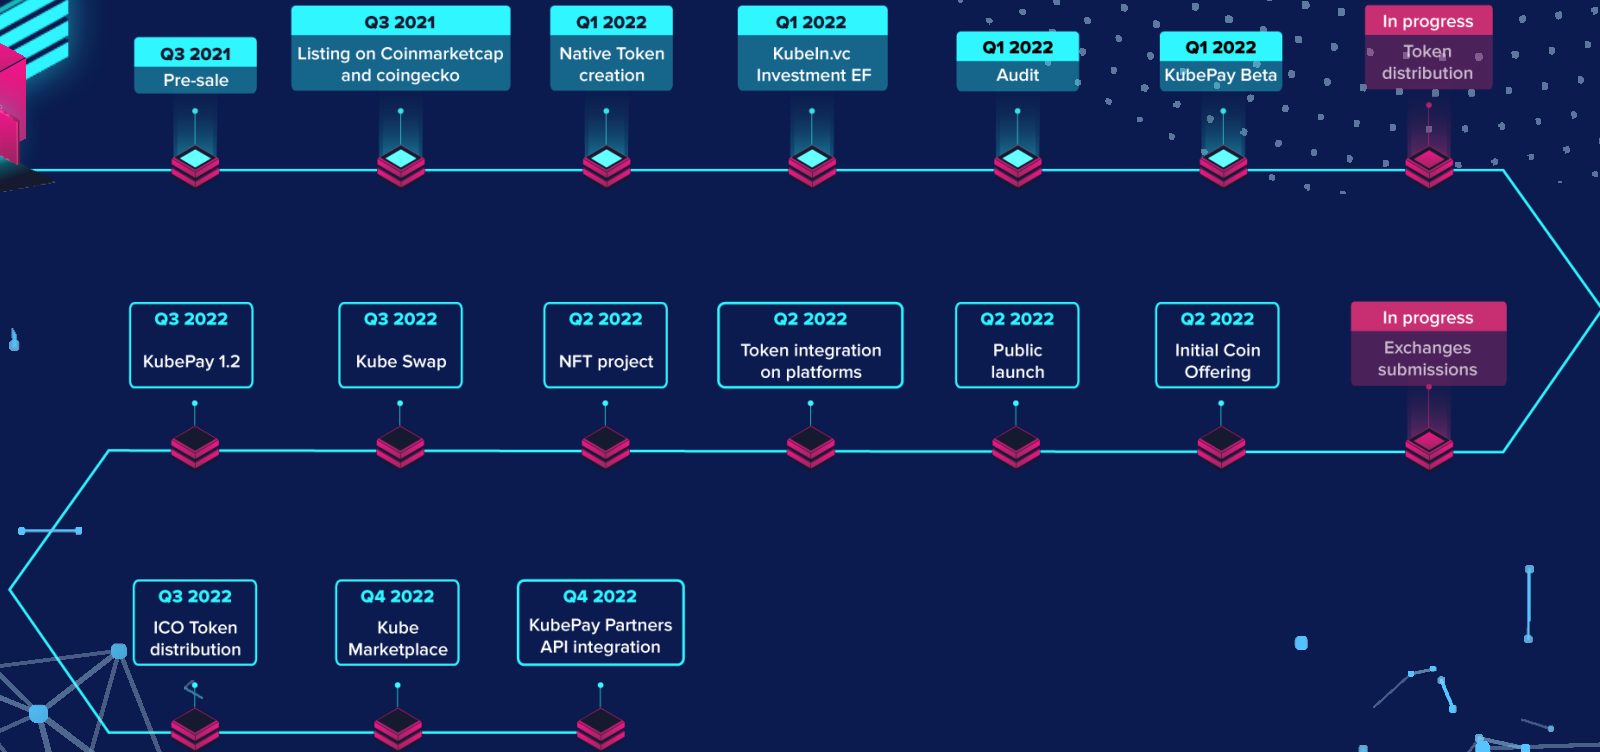

Public Launch
Q4 2022

KubeCoin is created and becomes readily available for public purchase on exchanges.

ROADMAP

Will be constantly updated with the company's future actions.

www.kubetrade.pro

LOW-ENERGY WIRELESS PRODUCT

- ❖ This technology replaces the most power hungry aspect of an IoT system. Though sensors and other elements can power down over long periods, communication links (i.e., wireless) must remain in listening mode. Low-energy wireless not only reduces consumption, but also extends the life of the device through less use.
